ABOUT ME

As a passionate and adaptable web developer, I am committed to continuously expanding my skills and staying at the forefront of emerging technologies. My ability to quickly absorb new concepts allows me to thrive in the fast-paced, ever-evolving tech landscape. I am highly skilled in collaborating with cross-functional teams, leveraging my strong communication abilities to foster seamless collaboration and ensure the successful delivery of projects. Driven by a deep passion for innovation, my goal is to make a lasting impact in the IT world. I strive to contribute to technological advancements that not only shape the future but also drive meaningful change within the industry.

EDUCATION

2018 - 2022

Negros Oriental State University

Bachelor of Science in Information Technology

- Developed foundational concepts in information technology. This includes gaining insight into areas such as computer systems, networking, databases, software development, web development, and graphics designing

2023

KodeGo Bootcamp

Certified Full-Stack Web Development Bootcamp Completer

- Develop web based application to store and manage employee information such as personal details, contact information, and employment leave history.
- Created first portfolio as a web developer.
- Tech stack used are Reactjs, Nodejs, Express.js, MongoDB

EXPERIENCE

2024 - NOW

Nabepero Philippines Inc.

Software Engineer

I developed features and implemented tests for Sozo and Jukuage, streamlining school management systems. I collaborated with Filipino and Japanese engineers, overcoming language barriers. I utilized technologies like Laravel, AWS, PHPUnit, and Playwright to ensure efficient and high-quality solutions.

2022 - 2023

Municipality Of Ayungon

Front-end Developer

I developed a static website to showcase the municipality's accomplishments and ongoing projects. The site highlights key initiatives and milestones, offering a user-friendly and informative experience. It aims to enhance community engagement and transparency between local authorities and residents.
